

## Career Objective

---

Highly motivated and enthusiastic Front-End Software Engineer with a bachelor's degree in Software Development from the University of South Australia, bringing about 5 months of industry experience in developing scalable, high-performance web applications using React.js, Next.js, TypeScript, and Node.js.

Creative and detail-oriented, with hands-on experience in the Software Development Life Cycle (SDLC), Agile methodologies, and clean architecture with best practices. Proven ability to collaborate within cross-functional Agile teams, contributing to continuous integration, release management, and feature development.

I am eager to learn and willing to transition to new technologies, leveraging my strong web development fundamentals to contribute effectively to a dynamic organization like GoCardless as a Frontend Software Development Engineer.

## Technical Skills

---

<b>Programming Languages:</b>	JavaScript, TypeScript, Node.js and React
<b>Testing:</b>	User acceptance testing and unit testing
<b>Tools:</b>	Visual Studio Code, Zoom, Notion, Jira and Git
<b>Web Development and Software Design:</b>	SDLC and Clean Architecture

## Education

---

**Professional Year** **Oct 2024 - Feb 2025**

Performance Education, Adelaide

*Key Subjects: Internship Preparation and Applied Job-Search Skills*

**Bachelor of Software Development** **Jul 2022 – Jul 2024**

University of South Australia, Adelaide

*Key learning areas included: Web fundamentals, Project Studio, Design Thinking Studio and Database for Enterprise*

## University Project

---

**Online reservation booking for SGV restaurant** **Jul 2023 - Oct 2023**

University of South Australia, Adelaide

**Objective:** To develop a functional website for SGV restaurant, that allows users to reserve a seat and pre-order their favourite banquets with achievements and ranking system.

**Tools:** Agile methodologies, React.js, .NET Core MVC, C#, MS SQL, APIs web services, SDLC and Git.

**Duties:** As Product Owner in a team of 6, I gathered client requirements and led the development of back-end features (pre-order banquets, achievements) using .NET and C#, overseeing the full SDLC from design to deployment.

**Outcome:** After conducting a review with my client, a pitch presentation was scheduled to showcase the work and the tools used.

**Result:** Obtained Distinction for this project
